

## 16/08/2011 – Single Skating, Spins

2011/2012 Records of Clarifications from Sports Directorate and Technical Committee

SINGLE SKATING

Spins

### **Question:**

**If a skater in a Layback spin has UL (haircutter type), Increase of speed IS and Biellmann, will Biellmann count as an additional (third) Level feature?**

### **Answer:**

**Increase of speed is a difficult spin variation. According to the Technical Panel Handbook, Biellmann position is considered as a difficult variation of the Upright position US. TP Handbook also states that the total number of difficult variations in one spin cannot be more than 2. That is why Biellmann in our case cannot be counted as a third Level feature.**
