

Technical Notification #2

DATED: June 6, 2007

The Technical Group announces the following items regarding ice dancing:

1. Per the test rule permitting the dance chair to revise free dance tests if a substantive change has occurred in the required technical elements by the ISU for competitive free dance:

Effective June 6, 2007, the junior and senior free dance tests only will have the additional option to include the following step sequence: Not Touching Midline Step Sequence.

2. Lifts: The long lift category (reverse rotational, serpentine and combination lifts) have a new permitted duration of a maximum of 12 seconds. For the U.S. novice ice dance event and novice free dance test, this is a permitted duration for the long lift.
3. The Not Touching Midline Step Sequence is not a permitted option in competition for juvenile, intermediate and novice free dance.
4. The two or three bold curved serpentine step sequence is a permitted option for novice free dance test or competition.
